Experience & Projects

Resume Screening SaaS Platform — **October2025-November 2025**

- Identified inefficiencies in resume screening workflows, defining a self-serve SaaS solution to reduce manual effort and improve hiring consistency.
- Designed a candidate matching and recruiter-facing insights, focusing on usability and decision support.
- Boosted adoption by highlighting 90% accurate candidate role matching as a daily-use feature that improves hiring quality and confidence.

RAG-Enhanced Stock Market Intelligence System — **June 2025-August 2025**

- Conducted user and market analysis to uncover gaps in existing advisory tools and design a differentiated product offering.
- Developed a product with integrated predictions and intuitive dashboards, prioritizing actionable insights.
- Presented insights through intuitive dashboards, enabling data storytelling for user acquisition and retention.

Automated Administrative Chatbot — **July 2024-August 2024**

- Recognized repetitive admin queries as a key user pain point, conceptualizing an automated chatbot solution.
- Built and iterated on a scalable chatbot with personalization, improving response relevance to the context and usability.
- Increased engagement by 15% through personalized responses, supporting long-term retention and satisfaction.

Achievements

BitByBit Club – Lead (Outreach & PR Department)

- Drove student outreach and event pitching via WhatsApp and on-ground engagement.
- Engaged 400+ prospective learners through classroom pitching, WhatsApp outreach, and on-ground promotion, contributing to ₹75k+ cumulative event revenue.

Cyber Warrior Club – Student Coordinator

- Coordinated end-to-end communication for 200+ students per semester, managing registrations, confirmations and reminders.
- Assisted in pricing and positioning discussions based on student feedback, helping optimize event participation vs pricing balance.

Certifications

- IBM Generative AI Using Watsonx — **May 2025**
